SUBJECT INDEX

A

Aber, J. D., 24
Abrahamson, W. G., 416
Abyssochrysidae, 325
Abyssochrysos, 325
Acidification
  soil degradation due to, 50
Acid precipitation
  causes of, 6
  plant gas exchange and, 209
  plant nutrient uptake and, 213
Acochlidiacea, 328
Acteon, 327
Acteonoidea, 327
Adam, D. P., 159
Adaptation
  habitat associations and, 249-51
  at molecular level, 278-80
  natural hybridization and, 248-53
Adaptive speciation hypothesis, 248
Advanced Spaceborne Thermal Emission and Reflectance Radiometer (ASTER), 191
Advanced Very High Resolution Radiometer (AVHRR), 189, 191
Aerosols
  atmospheric/tropospheric glacial/interglacial variations in, 155
  land transformation and, 49
Africa
  grass invasion in, 67-68
Agegian, C. R., 98-99
Agricultural intensification, 10
  human population growth and, 54-55
Agricultural productivity
  availability of water and, 119
Agriculture
  rainfed
    area suitable for, 43
Akeridae, 328
Allee effect, 492-94
Allelopathy
  grass invasion and, 71
Amazon Boundary Layer Experiment (ABLE), 180, 188
Amino acid sequencing
  hemoglobin and, 265
Analysis of variance (ANOVA), 433-34
  nested, 388-89, 398
Anaspidea, 328
Anderson, M. M., 348, 350
Andreae, M. O., 79
Androgyna, 316
Aneita, 330
Anguilla anguilla
  cytonuclear disequilibrium estimates for, 249
Animal species
  reticulate evolution in, 239-42
Annelids
  gastropod derivation from, 313
Antarctic ozone hole
  chlorofluorocarbons and, 4-5
Aquadro, C. F., 270, 277
Archaeogastropoda, 319
  classifications of, 320
Archaeopteryx, 467-69
Archaeopulmonata, 329
Architectibranchia, 327
Architectonica
  ptenoglossate radulae of, 316
Architectonicidae, 326
ARIMA model, 489-90
Arions subfuscus
  sex change in, 530
Arnold, M. L., 237-54
Artificial selection, 287-305
  correlated responses and, 296
  fitness and, 303-5
  gene action and, 302-3
  gene frequency and, 301-2
  gene number/effects and, 299-301
  genetic correlations in, 291
  induced mutation and, 298
  long-term response and, 294-96
  mixed model analysis in, 292-93
  quantitative genetic parameters in, 289-93
  response variance in, 290-91
  short-term response and, 293-94
  spontaneous mutation and, 296-97
Asynchrony
  population fluctuations and, 493
Atmosphere
  circulation models for, 144
Atmospheric change, 2-3
  global effects of, 6
  terrestrial ecosystems and, 201-25
Atz, J. W., 364
Ausich, W. I., 352-53
Australia
  grass invasion in, 67
  fire regimes and, 76
Autoregression
  comparative analysis and, 392-94
Auto-regressive integrated moving average model, 489-90
Axelrod, M. X., 24
Aytheya, K. B., 500

B

Baerends, G. P., 366-67
Bales, R. C., 110
Balloon flies
  nuptial offerings in development of, 369
Bandel, K., 316, 324
Barlow, G. W., 365, 371-72
Barrowclough, G. F., 485
Bartlein, P. J., 8, 141-66
Basommatophora, 329
Basten, J. B., 282
Beer, C. G., 367-68
Bees
  pollen collection by species-specific, 372
Behavior
  homologous, 362
  units of, 369-77
Behavioral biology
  learning in, 374-76
Behavioral homology, 361-78
  learning in, 374-76
  ontogeny in, 376-77
  units of behavior in, 369-77
Behavioral ontogeny, 376-77
Behavioral programming, 526-29
Bellerophonts, 313
Belovsky, G. E., 488
Bennett, K. D., 163
Berglund, B. E., 144
Bergstrom, J., 343
Best linear unbiased prediction procedure, 292
Bieler, R., 311-31
Bighorn sheep
  extinction of, 498
Bilbao, B., 76
Binomials, 458-59
Binomial test, 429
Biodiversity
  habitat fragmentation and, 493

loss of
consequences of, 5-6
Biogeochemical cycles
remote sensing and, 185-88
Biological invasion
global environmental change and, 6, 63-80
Biomass
climate change and, 28-29
Biomass burning
atmospheric chemistry and, 78-79
land-cover change and, 49
tropospheric ozone and, 6
Biophysical processes
remote sensing and, 182-85
BIOSIS, 417-20, 436
Biosphere
availability of water in, 119
Biospheric Aspects of the Hydrologic Cycle (BAHC), 10
Biotic indicators
geographic variations of, 151
Biotic response
variations during last 20,000 years, 150-52
variations during last 175,000 years, 156-59
variations during last 3 million years, 162-63
Bioturbation, 339-57
early record of, 341-51
extent of, 350-51
Birkeland, C., 105
Birks, H. H., 144
Birks, H. J. B., 144
Birth-death process
extinction modeling and, 487-88
Bleaching
of corals on coral reefs, 94
Bock, C. E., 70
Bock, W. J., 368
Body fossils
trace fossils compared, 340
Boecklen, W., 421
Boettger, C. R., 327
BOFORS model, 20
Bombina bombina
genetic variation in, 249
Bombina variegata
genetic variation in, 249
Bonan, G. B., 24, 27
Bonner, J. T., 508
Bootstrapping, 405, 415-17
advantages/disadvantages of, 430-32
constructing confidence intervals with, 413
Boreal Ecosystem-Atmosphere Study (BOREAS), 181
Boreal forests
agricultural expansion and, 43
Borowitzka, M. A., 99
Boserup, E., 54
Boss, K. J., 311
Bottjer, D. J., 348, 350, 352-53
Boundary conditions
variations during last 20,000 years, 146
variations during last 175,000 years, 152-56
Bounded hybrid superiority hypothesis, 248
Bouvier, E. L., 316
Boyce, M. S., 481-500
Bradley, R. S., 143-44
Bradshaw, A. D., 166
Brenchley-Jackson, J. L., 491
Bridges, C. B., 279
BRIND model, 24
Bromley, R. G., 352
Brooks, D. R., 384
Brown, B. E., 104
Brown, W. M., 242
Buddemeier, R. W., 9, 89-112
Bullock, T. H., 364
Bulmer, M. G., 289-90, 293, 296, 300
Burrows
evolutionary development of, 343-45
Busing, R. T., 23

C

Caballero, A., 287-305
Caenogastropoda, 319, 324
classifications of, 321
Cain, A. J., 459
Caldwell, M. M., 69
Caledia captiva
hybridization/introgression in, 243
Callianassa major, 356
Cambrian deposits
gastropod fossils in, 313
Canopy reflectance
biophysical/biochemical processes and, 184
Canopy tree
environmental alteration from, 17
Carabid beetles
temporal niche differentiation in, 409
Carbonate mineral saturation
coral reef ecosystems and, 98-99
Carbon cycle
environmental forcing factors and, 221-24
global
coral reef calcification and, 91-92
terrestrial ecosystems and, 30
remote sensing and, 185
Carbon dioxide
atmospheric
coral reef contributions to, 92
herbivory and, 214-15
land-cover change and, 48
during last 20,000 years, 146
during last 175,000 years, 155
plant community responses to, 214
climate changes induced by response of forests to, 28
doubling of
temperature increase due to, 4
effects on plants, 206-9
global concentrations of
increases in, 2-3
plant isoprene emission and, 211
Carbon monoxide
atmospheric
land transformation and, 49
Carbon reservoirs
environmental change and, 91-92
Carbon sink
biosphere
mechanisms of, 224
Carbon storage
global climate feedbacks and, 131
Carpenter, S. R., 9, 119-33
Casdagli, M., 491
Castle, W. E., 299
Central America
grass invasion in, 66
fire regimes and, 75-76
Central Limit Theorem, 415, 430
Cephalaspidea, 326-27
Chapin, F. S., 201-25
Charr
stream habitat of
global warming and, 124
Chessman, B. C., 128
Cheverud, J. M., 392-94
Chlorofluorocarbon-11
global increases in, 3
Chlorofluorocarbons
Antarctic ozone hole and, 4-5
global increases in, 3
stratospheric ozone and, 4-5
Chondrites, 353
Cichlids

calling behavior of
motivational factors in, 367
Clades, 452
nested, 453
standard names for, 469-71
Cladistic analysis
resampling methods and, 427
Clark, P. J., 424
Clayton, G. A., 293
Clear-cut timbering
land conversion and, 44
Clebsch, E. E. C., 23
Clemney, H. I., 342
CLIMAP, 145-46
Climate
amount and distribution of
freshwater and, 119
models for, 144-45
soil erosion/sediment transport
and, 121
See also Regional climate
Climate change
biomass and, 28-29
carbon dioxide-induced
response of forests to, 28
coral reefs and, 9
evapotranspiration and, 120
greenhouse gases and, 4
land-cover change and, 50
rhythms of perturbation and,
125-29
riparian vegetation and, 123
species composition and, 28-
29
stream ecosystems and, 127-
28
vegetation response to, 27
See also Global environmental
change
Climatic forcing, 150
marine ecosystem responses
to, 156-57
Cline theory
hybrid zones and, 248-49
Cloud, P., 342
Cloud cover
lake productivity and, 131
Cochlichnus, 346
Coddington, J. A., 365-66
Cohen, J. E., 490
COHMAP, 145-46
Cold Spring Harbor Symposium,
287
Coles, S. L., 104
Collins, J. P., 508
Committee on Global Change,
40
Commoner, B., 51
Community structure
statistical resampling and,
420-23
Comparative analysis, 383-401
elements of, 384
methods of, 389-90
autoregressive, 392-94
computer simulation, 395-
400
divergent assumptions in,
394-95
independent contrast, 390-
92
problems in, 386-89
Competition
statistical resampling and,
420-23
Computer simulation
comparative analysis and,
395-400
Confidence intervals
resampling methods and, 427
Coral reef calcification
global carbon cycle and, 91-
92
Coral reef ecosystems
biogeophysical experiment
and, 94-96
carbonate mineral saturation
and, 98-99
currents, waves, and storms
and, 103-4
defining organism of, 89
as geochemical reservoirs, 91-
92
global environmental change
and, 89-112
inorganic plant nutrients and,
105-7
land use change and, 9
responses to environmental
variables, 96-107
salinity and, 104-5
sea-level rise and, 96-98
sedimentation and, 104
sensitivity of, 92-94
temperature and, 99-101
visible/ultraviolet light and,
101-3
Cornirostridae, 326
Correlation analysis
resampling methods and, 427
Coutinho, L. M., 76
Cowardin, L. M., 46
Cox, L. R., 311
Coyote
mitochondrial DNA phylo-
genies for, 240-41
Cracraft, J., 368
Craniata
phylogenetic taxonomy of,
473-75
Crimes, P., 339-57
Crossing-over
multigene families and, 279
Crossley, J. P., 346, 350
Crosson, P., 40
Crowell, K. L., 493
Crowley, P. H., 405-38
Crowley, T. J., 144
Crown clades
standard names for, 469-70
Cruziana, 341
Cultivated land, 42-44
world total of, 43
Cultivation
rainfed
area suitable for, 43
Culture
land-cover change and, 56
Cyclostremiscus
salivary gland position in,
315
Cylindrobullidae, 328
Cytochrome *c*
evolution of, 265, 268
Cytonuclear disequilibrium
hybrid zones and, 249

D

Dannje, A., 367-68, 371

Data resampling
See Statistical resampling
Davis, M. B., 142, 166
Dean, A. M., 278
Deforestation
environmental warming due
to, 50
water quantity and flow and,
49
Deglaciation
biotic responses to, 150-52
during last 20,000 years, 146
Dehumification
soil degradation due to, 50
Demographic stochasticity
birth-death process and, 487
Demography
population viability analysis
and, 488-89
Den Boer, P. J., 424
Dennis, B., 493
Density dependence
population viability analysis
and, 492-93
resampling methods and, 423-
24
de Queiroz, K., 449-75
Desertification, 45-46
Development
evolution and, 508
Developmental programming,
529-30
Diapause, 508

Diaphanoidea, 327
Dickerson, R. E., 268
Dimorphichnus, 355
Diplichnites, 355
Discriminant function analysis
  resampling methods and, 428
Dispersal simulation model, 494
DNA hybridization, 266, 272
DNA polymorphism, 269-70, 277
DNA sequencing, 264, 266
Docoglossa, 313, 319-24
Dollar, S. J., 104
Domm, A., 106
Douglas, I., 47
Dowling, T. E., 242
Doyle, T. W., 23-24
Drainage
  land conversion and, 44
Droser, M. L., 339-57
Drosophila
  biochemical variation in, 264
  induced mutation in, 298
  mitochondrial DNA phylogenies for, 240-41
  realized heritability in, 293
  thorax length in
    directional dominance and, 302-3
  wing-tip height and ethanol tolerance in, 295
Drosophila melanogaster
  courtship display of
    species-specific wing rhythms in, 372
  DNA polymorphism in, 270, 277
  enzyme loci in
    polymorphic, 269
  spontaneous mutation in, 296-97
Drosophila simulans
  courtship display of
    species-specific wing rhythms in, 372
  DNA polymorphism in, 270, 277
Dudley, J. W., 302
Dune formation
  grass invasion and, 71-72
DUNE model, 26
Duplicative transposition
  multigene families and, 279
Dust
  atmospheric
    glacial/interglacial variations in, 155
Dykhuizen, D. E., 278
Dynamic-equilibrium hypothesis, 248
Dynamic-equilibrium theory, 166
Dynamic iteration, 510
Dynamic programming, 508
  backward equations in, 521-22
  behavioral, 526-29
  developmental, 529-30
  ecological applications of, 510
  fitness landscape in, 518-21
  linking genes, organisms, and selection, 517-18
  optimal, 523-24
  principles of, 513-17
  quantitative genetics and, 526
  seasonal environments in, 521
  stationary/nonstationary, 525-26
  stochastic, 522

Prosobranchia, 319-25
Prosobranchia-Opisthobranchia-Pulmonata, 316
Protandrous hermaphroditism
in gastropods, 315
Protease inhibitor
evolution of, 280
Protein polymorphism
at molecular level, 268-70
Provannidae, 325
Prum, R. O., 366
Pseudohermaphroditism
pollution-induced
in neogastropods, 315
P transposable elements, 298
Pulmonata, 329-30
classifications of, 323
Pyramidellidae, 326

Q

Quantitative genetics
dynamic programming and, 526
Quinn, J. F., 426

R

Rand, D. M., 250
Randomization, 405, 407-9
advantages/disadvantages of, 430-32
Rathouisiidae, 329
Raup, D. M., 426
Reddingius, J., 424
Redfearn, A., 497
Redundancy
in phylogenetic taxonomy, 465-66
Reeve, E. C. R., 302
Refrigeration
extinction of coral reef biota and, 92
Regional climate
freshwater ecosystems and, 131-32
variations during last 20,000 years, 146-50
variations during last 175,000 years, 152-56
Regression analysis
resampling methods and, 427
Reiners, W. A., 188
Remane, A., 364, 366-69
Remote sensing, 178-79
biogeochemical cycles and, 185-88
biophysical processes and, 182-85
global environmental change and, 181-89
new technology for, 191-92
simulation models and, 189-90
terrestrial ecosystems and, 188-89
Resampling
See Statistical resampling
Resource competition
environmental forcing factors and, 206
forest gap models and, 20
grass invasion and, 68-71
Resource supply
grass invasion and, 71
Respiration
in streams
temperature and, 129-30
temperature and, 208
Restricted maximum likelihood analysis, 292
Reticulate evolution
phylogenetic distribution of, 239-48
phylogenetic reconstruction and, 239-42
Rhodope, 329
Rhodopidae, 329
Rhysonetron byei, 342
Rhysonetron lahtii, 342
Ribulose-1,5-bisphosphate carboxylase/oxygenase
photosynthesis and, 206
Richards, J. F., 42
